URSALINK

Ursalink Provides Stable and Secure Internet Access for Video Surveillance in Server Room

In fact, it's a hard-hitting reality that most engineers can't expand their presence easily to remote server room. As a result, placing video surveillance for security improvements and real-time monitoring will be good for enterprises. Meanwhile, it saves troubles of on-site checking for technicians. Therefore, Milesight, the leading IP video surveillance provider, figures out the right approach to supply persistent connections for 24/7 monitoring and finally join hands with Ursalink.
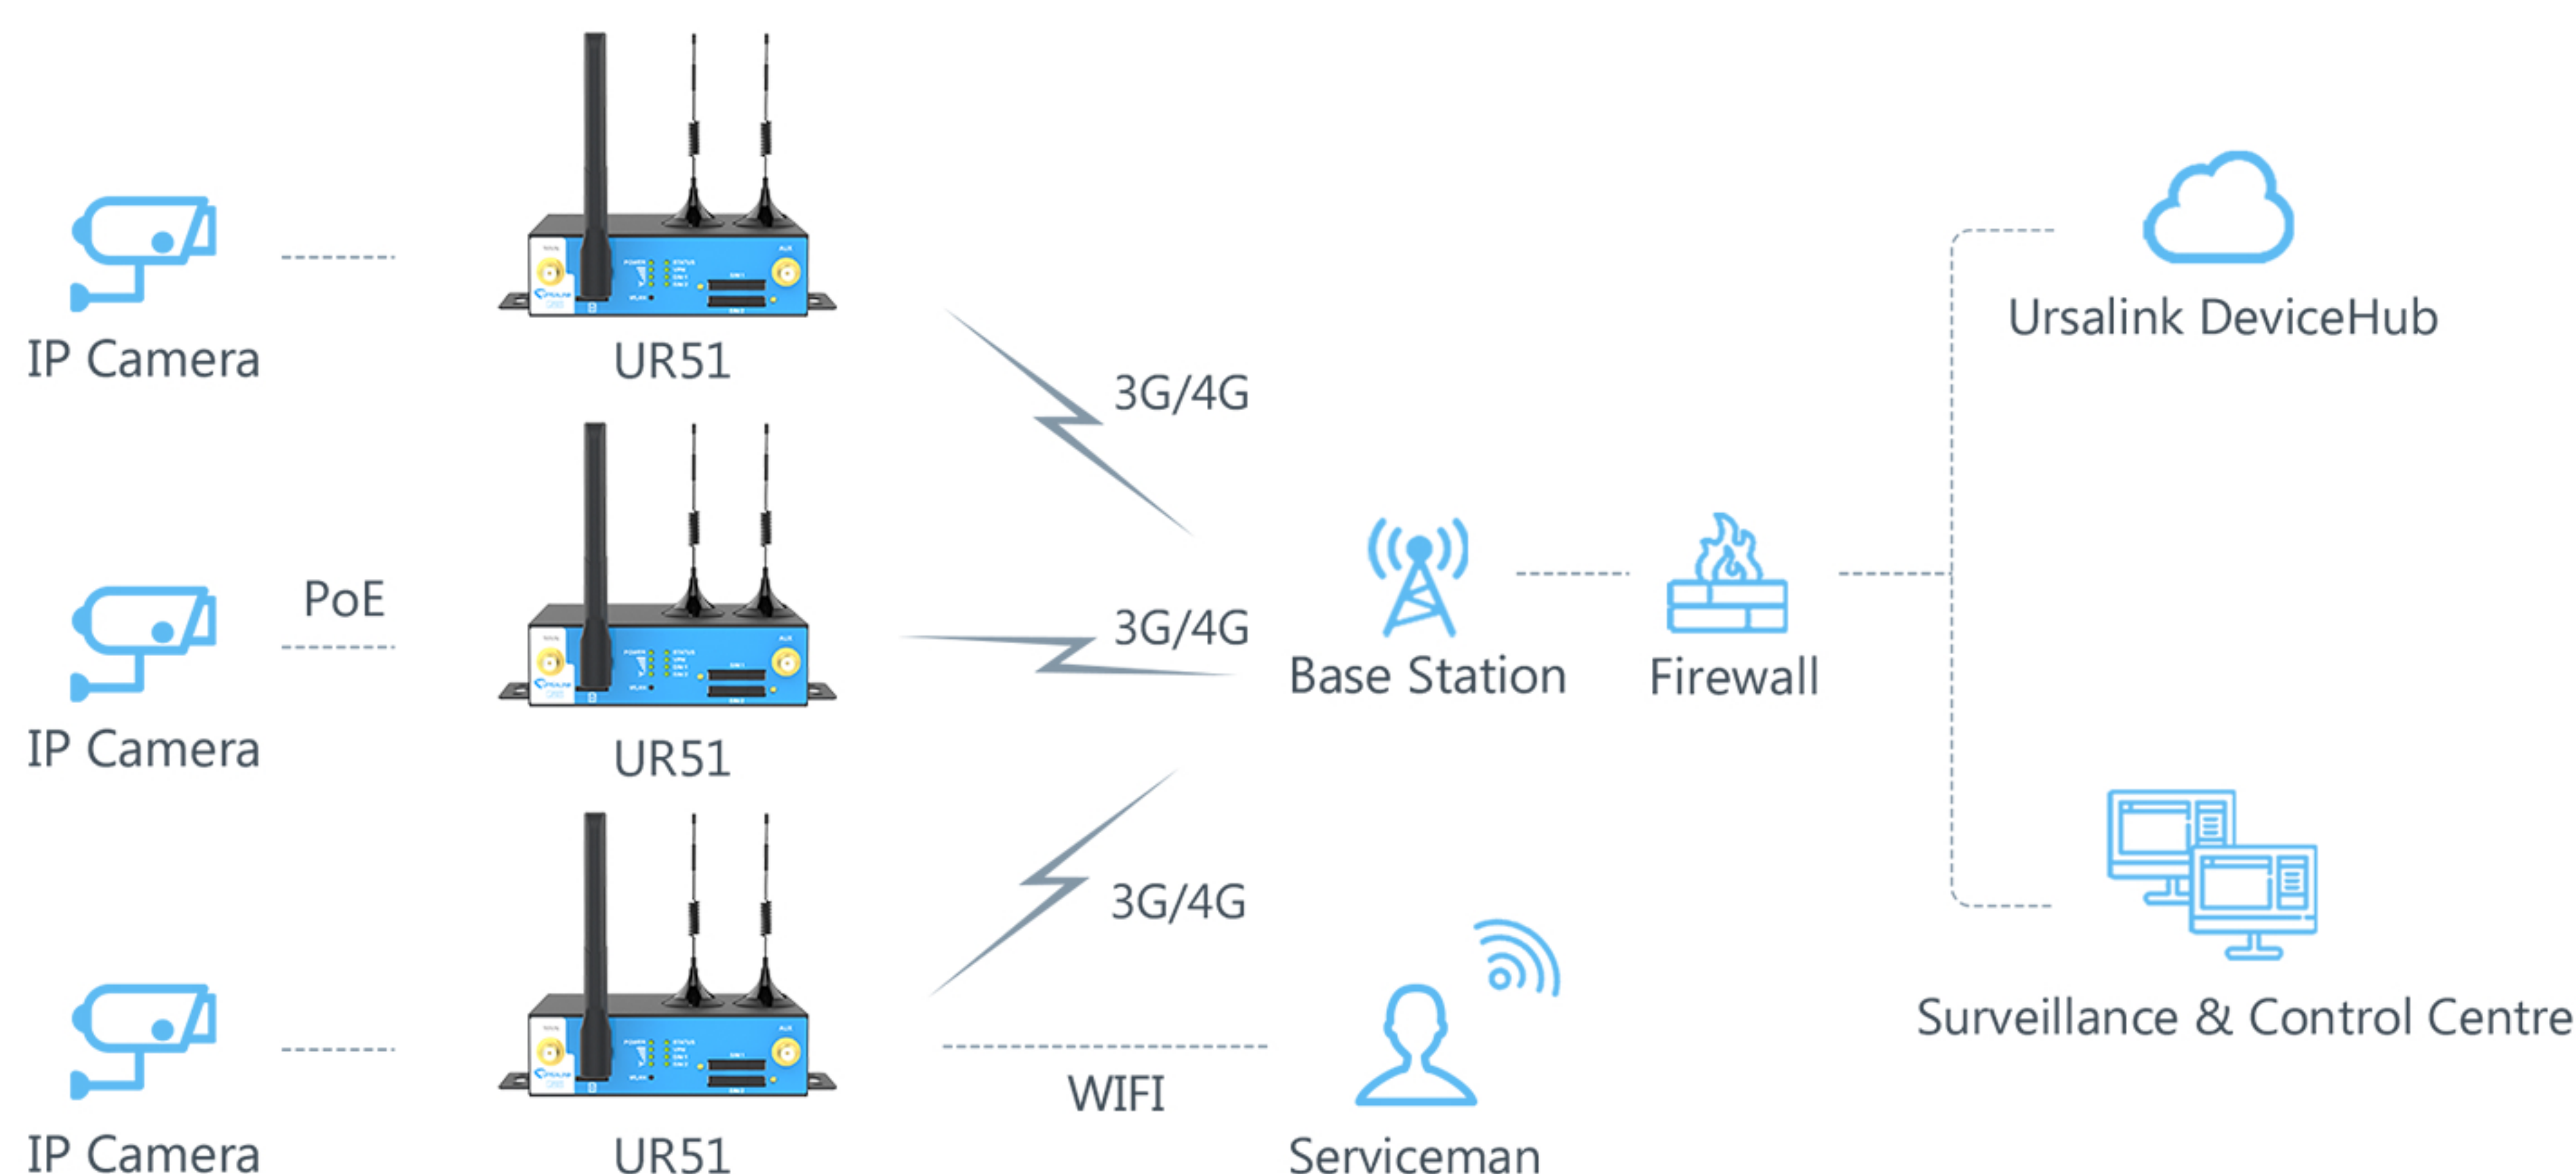

CHALLENGES

· Access to the Internet with wired connection
· 24/7 monitoring and real-time data transmission from equipment

SOLUTION

Firstly, Ursalink UR51 keeps carry on its top-notch performance through PoE connection with Milesight IP camera; secondly, it delivers intelligence of high-speed Wi-Fi network for every hard-to-reach server rooms; thirdly, the edge wireless connectivity with UR51's powerful capabilities allows quick troubleshooting online and receives timely respond without any delay. Meanwhile, the multiple encryption tunnels (VPN) and the 3G/4G/ETH backhaul connectivity will create a secure and stable environment for your data transmission. Beyond that, it will also empower your operational efficiency, gain visibility and verification of regulatory compliance.

KEY BENEFITS

- **Simplify Your Maintenance Effort**
  The integration of telematics technology will constitute the latest revolution for the remote server room monitoring and through which helps benefits of wireless connectivity exploited rapidly and will make field operation smooth and secure.

- **Connect with Peace of Mind**
  The convergence of SMS/Email alerts, real-time monitoring and remote control is an assurance that prevents your business from slipping into the read and gives you smart insights that help you make decisions with confidence. Everything is on track.

- **Ensures Business Continuity**
  The budget cuts and level-up productivity could be easily achieved through this end-to-end intelligence and will give you a hand to stand at the helm of your business that is bound to prosper.

FEATURED PRODUCT

Ursalink UR51 Industrial Cellular Router

- PoE capabilities with 9-48VDC at 802.3af
- Dual band Wi-Fi complies with 802.11 b/g/n/ac
- Extended operating temp from -40 to 70°C
- Multiple Encryption Tunnels for Data Transmission Security
- Scalable management with Ursalink DeviceHub
- 3G/4G/ETH Backhaul connectivity

About Milesight

Milesight is exclusively specialized in video surveillance technology by designing and manufacturing in Network cameras, NVR, VMS/CMS and accessories, etc. We offer future-proof, cost-efficient, high quality, and all-in-one solution. Focusing on the pursuit of excellent products and the concept of customers first, we are, therefore, striving to be the world expert on security solutions. Meanwhile, we provide future-proof products compatibility with any ONVIF compliant network video products.
